# SHIELD INSURANCE

## Problem Statement for Shield Insurance :

### Context :

Shield Insurance aims to enhance its analytics capabilities to better monitor customer acquisition, premium revenue, and policy performance across cities, age groups, and sales modes .

### Problem:

Currently, there is no dynamic system to track daily growth, customer demographics, or sales channel effectiveness, limiting strategic insights .

### Stakeholder Focus Areas :

- Track total customers, revenue, daily growth rates.
- Analyze month-over-month policy trends.
- Segment customers by age group and city.
- Build switchable revenue vs customer trend graphs.
- Enable filter-based analysis (sales mode, age, city, month, policy ID).
- Create dedicated pages for **Sales Mode Analysis** and **Age Group Analysis** .

### Objective :

- Develop an interactive dashboard to drive faster, smarter, and more informed business decisions .
